

**Data Collection and Distribution Report
(June 2010 - May 2011)**

Dieter André, Robin Barnes & Chad Bryant

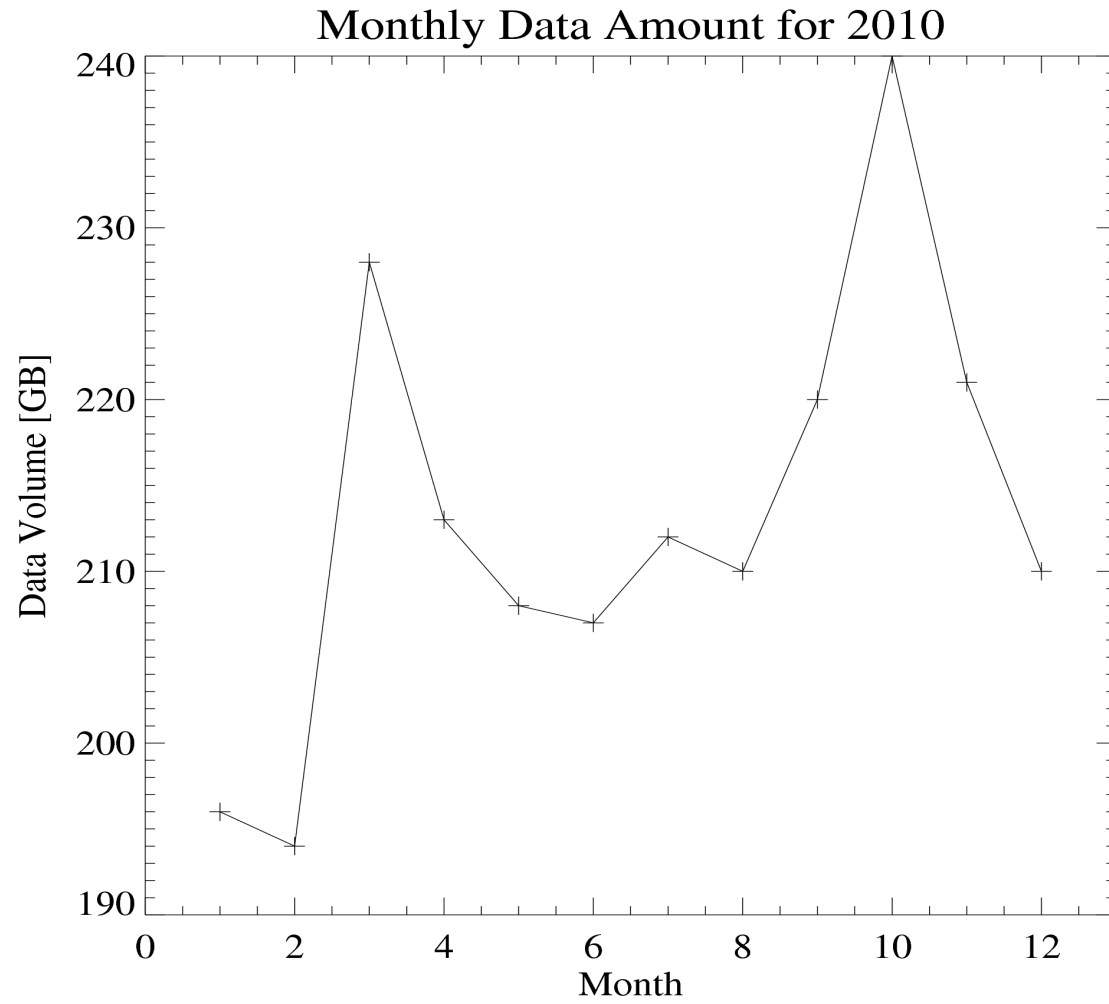

Hard drives written and distributed during the reporting period.

Data from all Radars

#4 : 20100101 -20100430; 1000GB; shipped 09th July 2010.

#5 : 20100501 -20100831; 1000GB; shipped 06th October 2010.

#6 : 20100901 -20101231; 1000GB; shipped 23rd March 2011.

Problems and Events

For hard drive sets #4 and #5 we used Seagate FreeAgent hard drives.

These hard drives are not manufactured any more.

For set #6 we therefore used Seagate GoFlex hard drives.

These are much smaller [laptop size], have only a USB 2.0 interface,
and are powered via the USB bus.

Access is somewhat slower than for the FreeAgent drives.

Since the capacity limit of the present drives [17GB still free on #6] has been reached,
from now on Seagate GoFlex hard drives with 1.5TB capacity
and USB 3.0 interface will be used.

Starting June 2011, Chad Bryant has taken over the data handling tasks.
